

# Know DilseWill.....

DiL SE WiLL is a web portal under its parent company Chessy Group founded by CA Raj Kumar Lakhota and CA Namita Lakhota who conceptualized the idea of DiL SE WiLL with the purpose to provide the best services in the field of Estate and Succession Planning.

Since the last seventeen years, our founder team is dedicated in providing the services in the field of Audit and assurances, Transaction advisory, Taxation (Income Tax and GST), Company Law Advisory & Support Services. We are a group of companies with young entrepreneurs who take up various projects from time to time. Mr. Lakhota has a vision to keep creating opportunities which add value to the organization and to the society. “DiL SE WiLL” is one of our projects. It intends to create and ease the process of making will. Our site also simplifies the process of making effective Will and makes it available to one and all.

# Why Will making is important?

In our research towards the initiative of creating awareness about the importance of making a will, we found out that 66% of all cases are property related litigations and 10% the second largest chunk, are family matters pending at several courts of India.. The above 66% cases could have reduced to a great extent if all these families had their Will in place. Each and every person has assets in some form and it is their responsibility to transfer those assets as per their wishes. Since the rise in mortality rate in young Indians are increasing day by day Will making is important for the young as much as it is for the old too.

## DiL SE WiLL Mission

- To create awareness in the masses about the importance of will making, even for young adults.
- To simplify the process of will making and make it available to one and all irrespective of geographical locations, at affordable prices.
- To become a One Stop Solution provider for world class services in the field of Estate and Succession Planning.

# Why partnering is important?

- The main objective of partnership is the true synergy of one plus one equals five instead of two.
